There are two types of license that can be configured within LMI tool:

1) Named User License (\$36 per named user per month):

- Each individual user (enterprise ID) configured within LMI tool would be charged (\$36 per named user per month).
- There is no limit on the number of users you can configure within LMI tool.
- There will be NO limit on license usage.

2) Concurrent / Fixed License (\$56 per license per month)

- Fixed license is done based on 1:4 ratio; where 1 fixed license can be assigned to 4 user accounts.
- I am taking 3 license for this example. You can configure 12 user accounts for 3 fixed license.
However, you will be limited to 3 simultaneous login at any given point in time. If the 4th user tries to login, he / she will be given error message.
